

# Gen-Sep™

A Gen-Sep gas and water separator is a new and valuable tool to protect your set and quiet generator operation.

Gen-Sep will remove nearly all of the cooling water from the exhaust. That water can be drained to a hull fitting just below the waterline. This eliminates the irritating noise created by splashing and pulsating water flow at the exhaust outlet.

Several sizes of Gen-Seps are available. Follow installation instructions supplied with the unit. A basic installation diagram is shown here.
